CHALLENGES

- **Over population:** in recent years, the department had a surge of prisoners being confined. This led to the prisoner population going from 500 count to over 800 prisoners.
- **Antiquated buildings & need for a new facility:** Due to the increase of prisoners, buildings that were once designated for treatment and rehabilitation were converted to prisoner quarters. As a result, treatment programs are limited due to spacing.
- **Financial woes:** large funding needed to address the increase in federal mandates (prisoner health and welfare) and the shortage of staff (which causes increase in officer overtime).

OUTLOOK

Moving forward, one positive step at a time:

- As a department, we are working with Superior Court to identify low risk detainees who can be safely released while going through the legal process.
- In partnership with Superior Court, treatment professionals of DOC have gone through evidence based training for risk assessments and treatment. The risk assessments help identify the high risk offenders in need of close supervision upon release and need of treatment and programming.
- Re-habilitating housing units: in collaboration with the office of the Governor and Lt. Governor, DOC management has completed the installation of all locking devices within three housing units and continue to work on the installation of security cameras throughout the facility. Combined efforts, provides additional safety and security to staff and prisoners.
- We continue to recruit new officers and invest in the staff we currently have by bringing valuable training to address prisoner safety, reduction of recidivism.
- We continue to partner with Guam Memorial Hospital and Guam Behavioral Health and Wellness Center to provide services to the prison-
