INVITATION FOR BID (IFB)

Bid No.: GSWA001-15

For: Item 1.1: 25 Cubic Yard Refuse Collection Trucks (3 each)
Item 1.2: 10 Cubic Yard Refuse Collection Trucks (2 ea.)

Bid Opening Date: Monday, October 6, 2014

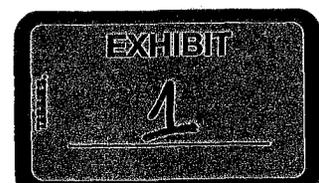

Time: 10:00 A.M.

Location: Department of Public Works Compound, Guam Solid
Waste Authority Building, 2nd Floor

*Mandatory Pre-Bid Conference scheduled for Tuesday, September 23, 2014,
10:00 a.m., at Guam Solid Waste Authority Building 2nd Floor.

Bid packages are available on website guamsolidwasteauthority.com or can be
picked up at GSWA Building, 2nd Floor

/s/ LINDA J. IBANEZ,
Guam Solid Waste Services Administrator

**SOLID WASTE
MANAGEMENT
CONSULTANTS
RECEIVER**

GOVERNMENT OF GUAM

SEALED BID SOLICITATION INSTRUCTIONS

1. **BID FORMS:** Each bidder shall be provided with two (2) sets of Solicitation forms. Additional copies may be provided upon request. Bidders requesting additional copies of said forms will be charged per page in accordance with 2 GAR Division 4 § 2109(f)(1) of the Government Code of Guam. All payments for this purpose shall be by cash, certified check or money order and shall be made payable to the Solid Waste Management Division.
2. **PREPARATIONS OF BIDS:**
 - a) Bidders are required to examine the drawings, specifications, schedule, and all instructions. Failure to do so will be at bidder's risk.
 - b) Each bidder shall furnish the information required by the Solicitation. The bidder shall sign the solicitation and print or type his name on the Schedule. Erasures or other changes must be initialed by the person signing the bid. Bids signed by an agent are to be accompanied by evidence of this authority unless such evidence has been previously furnished to the issuing office.
 - c) Unit price for each unit offered shall be shown and such price shall include packing unless otherwise specified. A total shall be entered in the amount column of the Schedule for each item offered. In case of discrepancies between a unit price and extended price, the unit price will be presumed to be correct.
 - d) Bids for supplies or services other than those specified will not be considered. Time, if stated as a number of days, means calendar days and will include Saturdays, Sundays, and holidays beginning the day after the issuance of a Notice to Proceed. Time stated ending on Saturday, Sunday or Government of Guam legal holiday will end at the close of the next business day.
3. **EXPLANATION TO BIDDERS:** Any explanation desired by a bidder regarding the meaning or interpretation of the Solicitation, drawings, specifications, etc., must be submitted in writing and with sufficient time allowed for a written reply to reach all bidders before the submission of their bids. Oral explanations or instructions given before the award of the contract will not be binding. Any information given to a prospective bidder concerning a Solicitation will be furnished to all prospective bidders in writing as an amendment to the Solicitation if such information would be prejudicial to uninformed bidders.
4. **ACKNOWLEDGEMENT OF AMENDMENTS TO SOLICITATIONS:** Receipt of an amendment to a Solicitation by a bidder must be acknowledged by signing an acknowledgement of receipt of the amendment. Such acknowledgement must be received prior to the hour and date specified for receipt of bids.
5. **SUBMISSION OF BIDS:**
 - a) Bids and modifications thereof shall be enclosed in sealed envelopes and addressed to the office specified in the Solicitation. The bidder shall show the hour and date specified in the Solicitation for receipt, the Solicitation number, and the name and address of the bidder on the face of the envelope.
 - b) Electronic bids will not be considered unless authorized by the Solicitation. However, bids may be modified or withdrawn by written or electronic notice, provided such notice is received prior to the hour and date specified for receipt (see paragraph 6 of these Instructions).
 - c) Samples of items, when required, must be submitted within the time specified, unless otherwise specified by the Government, at no expense to the Government. If not destroyed by testing, samples will be returned at bidder's request and expense, unless otherwise specified by the Solicitation.
 - d) Samples or descriptive literature should not be submitted unless it is required by this solicitation. Regardless of any attempt by a bidder to condition the bid, unsolicited samples or descriptive literature will not be examined or tested at the bidder's risk, and will not be deemed to vary any of the provisions of this Solicitation.
6. **FAILURE TO SUBMIT BID:** If no bid is to be submitted, do not return the solicitation documents unless otherwise specified. A letter or postcard shall be sent to the issuing office advising whether future Solicitations for the type of supplies or services covered by this Solicitation are desired.

General:

These specifications have been written to describe the minimum equipment and performance requirements to be supplied by the equipment manufacture bidding. Reasonable test may be conducted upon delivery prior to acceptance of the delivery. The successful bidder shall furnish all necessary and desirable information with instructions for the proper operation of the equipment.

Contract:

The Guam Solid Waste Authority (GSWA) reserves the right to accept and/or reject any and all bids, to waive any defects, irregularities, or specification discrepancies and to award the bid as council deems to be in the best interest of the government.

The contract that results from this procurement will be in effect for a period of three (3) years. The GSWA expects to purchase a minimum of two (2) vehicles with the possibility of purchasing others during the term of the contract upon need and availability of funding.

Yearly Maximum Escalation:

If the bidder intends to have a price escalator, bidder must provide the maximum percentage of annual escalation and cannot exceed five (5) percent each year. Please provide an explanation as to how the percentage price escalation was derived and supported.

	CATEGORY 1	Included Not Included
Number of trucks to purchase	3 each	
Size of Packer	25 CUBIC YARD	
Engine:	Compitable with diesel fuel on Guam 320HP @2100rpm / 1,150 ft.lbs of torque	
Electrical:	160 AMP alternator, brushless voltage regulator 12 volt starter 3 12V Dual purpose batteries @ 2250 CCA Standard auxiliary outlet Battery disconnect switch, mounted on Battery Box	
Transmission:	Allison 4500 RDS Transmission 6 Speed Allison World Transmission Rugged Duty Service 1760 HD driveline Allison output function "s" - Neutral Indicator for PTO Allison transmission fluid test port with remote cuppler 70 Maximum Speed in Top Gear 60 Maximum Cruise Speed	
Axle Capacity:	Front - 20,000 lbs axle with 22,000 lbs springs Rear - Axle 46,000 lbs 46,000 lbs Hendrickson HMX 460 Suspension Aluminum Hubs	
Front Tires and Rims	Front Axle: 315 80R/22.5 tire 20 Ply 22.5" by 9" aluminum wheel with 3.12" inset using an Alcoa #893657 LV1 finish	
Rear Tires and Rims	Rear Axle: 11R 22.5 tires 16 Ply 22.5" by 8.25" aluminum wheel using an Alcoa #883677 LV1 finish	
Body:	Low Cab Forward Complete rust proofing including cab undercoating with a three year corrosion and 5 year structural guarantee	

Cab to be fully welded, two-sided Galvanized all Steel Structure for Maximum Strength,
Safety, and Corrosion resistance
Front windshield with curved corners having a minimum of 2033 square inches for maximum
visibility
Rear Corner Windows in B-Pillars Post for Maximum Visibility and Safety

Brakes:

Refuse Service Brakes, all rear axles
Rear Brake Camshaft Reinforcement
Brake warning system
Anti-lock braking system (ABS)
4S4 M Air Cam Rear Drum Brakes 16.5 X 8.6
Air cam front drum brakes 16.5 X 7
For air pressure 60 psi or less audible and visible
Air dryer manual, slack adjuster, air dryer, and 18.7 CFM (minimum) air compressor

Steering:

Power Steering
Left hand drive
180 inches wheel base and 157 inch cab to axle or other configuration with turning
radius of Turning radius 31 ft maximum.

Shock Absorbers:

Shall be equipped with front double acting shock absorbers compatible with
(cont) manufacturer's gross vehicle weight rating (GVWR)

Exhaust:

Exhaust - Right Hand Vertical

CAB:

Front Bumper to back of cab 62" Minimum
Cab Forward Fabric Air Ride Mid Back Driver Seat
Fabric Non-air ride low back passenger seat
Fresh air conditioner
Fixed Rear Window BOC STD Tint
Radio
Auto mute when Allison transmission in reverse

Bumper Front:

Rain Gutters over both doors
Engine Oil Pressure and Coolant Gauges
Oil Temp Gauge Trans Main
Battery Disconnect
Engine Radiator 1300 square inch dual core minimum for maximum cooling capacity
Bumper shall be of pressed steel channel or equivalent material at least 3/16ths of an inch
(cont) thick and 8" to 10" height with tow pin

Color:

Chassis, including wheels and front bumper shall be black
Cab, hood, and packer body shall be white
The inside of packer must be painted in finished white

Lamps & Signal:

Switch engaged (marker light)

(5) marker lights
Daytime Running Lights
Solid state HD flasher

Fuel Tank:

Alum 75 Gallon Fuel Tank LH Boc
Perforated Metal Anti Siphon Device(s)

Power Take Off:

High pressure gear type hydraulic pump, PTO to be air shifted with switch on dash with
(cont) switch on dash board with Indicator light. (Cable operated PTO not acceptable)

Beacon Light:

Three (3) each Amber Strobe lights, 6" diameter in size, one (1)
on cab roof center mounted and two (2) on rear of packer body mounted below roof line
mounted on left and right side of packer body.

Mirrors:

Corrosion Resistant mirrors one (1) on driver side and one (1) on passenger side
8" convex mirrors center mounted under vertical
Corrosion Resistant mirrors
shall be motorized left and right side

Windshield Wipers/Washers:

Electric windshield wipers with intermittent feature and windshield liquid washer system

Control:

Two (2) Flashing Red Lights at rear vehicle.
Four (4) flood lights to be installed at rear
Two (2) to be mounted at the top of the tail gate
Two (2) to be mounted above rear packer controls and riding steps.
Controls to be mounted at rear by packer control.
These lights are to be grommet mount style for shock absorbance and ease of maintenance

Frame:

Frame full double channel or equivalent shall be of such design and strength characteristic
(cont) as to correspond to standard practice for trucks of same general load characteristics
(cont) which are used for highway service
Any secondary manufacturing process that modifies the original frame shall guarantee the
(cont) performance of workmanship and material resulting from such modification.
Any frame modification shall not be for the purpose of extending the wheel base
Holes in the top or bottom flanges of frame side shall not be permitted except as
(cont) provided in original chassis frame. There shall be no welding to frame side
(cont) rail except by chassis or body manufacturer

Packer Body

Refuse Body to be a minimum of 25 cubic yards capacity
Hopper capacity to be a minimum of 3.6 cubic yards capacity
Packer body shall meet ANSI standard Z-245.1.
The structural integrity of the body shall be designed to withstand load densities of up to
(cont) 1,000 lbs. per cubic yard of compaction

Body Construction:

Body Side: 10 ga-80,000 psi minimum
Body Roof: 10 ga-80,000 psi minimum
Body Floor: 3/16" -50,000 psi minimum

Packing Mechanism Construction

Total cycle time no more than: 20 seconds
Total re-load time no more than 3 seconds
Riding, non-skidding steps and grab handles on each side of the hopper will be supplied
Tailgate latches shall be hydraulically operated working in conjunction with the tailgate lift
cylinders
(cont) Manual or auxiliary automated latch systems are not acceptable.

Ejection System:

Unloading by full ejection method only. Dump style bodies are not acceptable.

Cylinder shall be mounted at an angle which protects the exposed cylinder rods from refuse
and/or

(cont) liquid contamination.

The ejector panel shall travel on urethane guide shoes. Rollers are not acceptable.

No portion of the ejector panel can extend beyond the rear body plane.

Hydraulic System:

The hydraulic pump shall be a fixed displacement rated at no less than 2,750 psi working
(cont) pressure and have sufficient capacity to equal 35-38 gpm flow at a reasonable engine
rpm .

Hydraulic pump shall be a direct mount to a transmission driven clutch activated PTO (hot
shift)

Hydraulic reservoir shall be located inside the body at the front right hand side.

Hydraulic reservoir capacity shall be a minimum of 50 gallons

Suction line at reservoir outlet shall incorporate a ball style shut off valve.

Visual site gauge for monitoring the hydraulic oil level and temperature shall be furnished

100 mesh suction strainer and a 10 micron in-tank style return line filter shall be furnished.

(cont) Return filter will have a visual indicator to show when the element needs to be
changed.

All directional control valves must be of adequate flow capacity which keeps system back-
pressured

(cont) to a minimum.

The front eject and tailgate lift valve shall incorporate the main system relief valve set at a

(cont) maximum of 2,750 psi. The eject section of this valve shall be fitted with a hydraulic

(cont) resistance valve which controls the ejection cylinder movement during operation for

(cont) maximum load density.

The rear packing mechanism control valve shall be mounted at the upper portion of the
tailgate

(cont) right hand side for ease of maintenance and protection from refuse.

The packer sweep function shall incorporate a relief valve that controls excessive induced
pressure

(cont) during pack cycle.

A speed up switch will interface with the engine throttle advance so the recommended engine

(cont) speed is obtained when the packing mechanism is in engaged mode.

All control levers for the valves must conform to ANSI Z245-1

Lighting and Wiring

A tailgate warning alarm and dash mounted light shall be incorporated and activate when the
(cont) tailgate is raised.

Body wiring interface to chassis wiring must be plug-in weather proof connectors.

(Cont) Splicing into the chassis wiring is not acceptable.

A speed-up auxiliary button shall be located at the front tailgate/eject valve location.

All wiring must be encased in split case style loom.

Wiring harness connections shall be double seal automotive type.

Painting:

The entire tailgate are to be washed with a phosphorus based solution.

Two coats of automotive grade primer and enamel shall be applied.

Truck Body shall be painted white.

Automatic Alarm/Backup Device

Automatic backup audible alarm that sounds on backing and is capable of emitting sound audible
(cont) under normal conditions from a distance of not less than 100 feet.

Roll Cart Lift
2 each Roll cart lift(s) installed on rear hopper with controls on driver side and curbside side of body.

Standard Features

Mud Flaps (front and rear)
Tool Box
Gauges to include
Ammeter
Oil and dual air pressure gauges
Fuel gauge
Speedometer (MPH)
Odometer
Hour Meter
Sunshield interior adjustable both sides
AM and FM radio
Air conditioning
Locking fuel cap
Roof mounted double air horn with Steering wheel horn dual electric under cab
Three(3) warning triangles
10 lbs fire extinguisher mounted in cab or two - 5lbs fire extinguishers one under each seat, both sides
First Aid kit

Required Accessories

Rear camera with 10 inch screen equipped with thermal/night vision for use when backing
(cont) automatically turns on when vehicle is in reverse.

Thermal insulator to shield cab from engine heat
Full tank of fuel and license plate mounting hardware
One (1) Operator's manual hardcopy
One (1) operator's manual on a CD
3 sets of key for ignition and cab
Two (2) complete illustrated parts book
Two (2) shop repair manuals
One (1) warranty manual

Warranty:

Minimum three (3) years/36,000 miles bumper to bumper vehicle warranty and five (5) years 60,000 mile limited power train warranty.
Preventive maintenance service for three (3) years/36,000 miles, all parts and labor shall be included at no extra cost to the GSWA.

	CATEGORY 2	Included	Not Included
Number of trucks to purchase	2		
Size of Packer	10 CUBIC YARDS

PROCUREMENT PROTEST Guam Solid Waste Authority

VIA FACSIMILE TRANSMISSION
and HAND DELIVERY

David Manning
Head of Purchasing Agency
GUAM SOLID WASTE AUTHORITY
Under the Management of Federal Receiver:
Gershman, Brickner & Bratton, Inc.
542 North Marine Corps Drive
Tamuning, Guam 96911
Facsimile: (671) 649-3777

RE: GSWA001-15 – Refuse Collection Trucks

Dear Mr. Manning:

This office represents Morrigo Equipment, LLC (“Morrigo”), 197 Ypao Road, Tamuning, Guam 96913, with respect to GSWA001-15, a procurement solicitation for refuse collection trucks.

Morrigo hereby files its protest with respect to the above-referenced procurement.

The reasons for this protest are as follows:

The Guam Solid Waste Authority (“GSWA”), has refused to amend its specifications for a cab forward design for each of the refuse trucks it seeks to acquire, despite the request of Morrigo in its September 25, 2014, letter to the GSWA. In the GSWA’s Addendum No. 1 issued on October 1, 2014, the GSWA amended a number of other specifications for the procurement of the subject refuse trucks, but did not address or amend the cab forward specification.

The refusal to amend the cab forward specification is unreasonable, arbitrary, capricious and an abuse of discretion. The cab forward design as specified by the GSWA has no

David Manning
Head of Purchasing Agency
GUAM SOLID WASTE AUTHORITY
October 9, 2014

substantive basis as a specification necessary to carry out the purposes for which the refuse trucks are being acquired. Further, the cab forward design has several disadvantages to the conventional cab design that will be offered by Morrico.

A cab forward design reduces operator comfort as the operator is seated directly over the engine and front axle. The operator therefore absorbs much more of the impact from road bumps/defects than would an operator seated in a conventional cab. The cab forward design is also hotter.

A cab forward design is not necessary to comply with the specifications of the solicitation governing turning radius, and the conventional cab refuse trucks to be offered by Morrico will meet the turning radius specification of the solicitation.

A cab forward design requires a heavy duty 20,000 lb axle capacity which is more expensive to purchase, and more expensive and difficult to maintain/service. Because of the 20,000 lb axle and cab forward specifications, the specifications further require more expensive front wheels and front tires.

A cab forward design reduces windshield visibility compared to the conventional cab to be offered by Morrico.

The conventional cab offered by Morrico is aluminum, not steel. It does not have the same corrosion concerns as a steel cab. The Morrico conventional cab design is cheaper to purchase, run and maintain. It has a smaller engine, transmission, radiator, front axle and suspension, while meeting all other specifications of this solicitation. The Morrico conventional cab is also safer to enter and exit. Finally, the conventional cab offers instant engine access, while the cab forward design makes engine access more inefficient and dangerous.

The development of product specifications is statutorily geared toward increasing competition among potential vendors. *See*, 5 GCA § 5265 (“All specifications shall seek to promote overall economy for the purposes intended and encourage competition in satisfying the Territory’s needs, and shall not be unduly restrictive.”). The GSWA’s cab forward specification is unduly restrictive, is in fact designed to reduce competition, and will actually increase costs for the Territory.

In addition, the GSWA specification of a cab forward design violates the provisions of 5 GCA § 5268. For example, “[s]pecifications shall not include requirements, such as but not limited to restrictive dimensions, weights or materials, which unnecessarily restrict competition, and shall include only the essential physical characteristics and functions required to meet the Territory’s minimum needs.” *See*, 5 GCA § 5268(a). Similarly, “[p]urchase descriptions shall describe the salient technical requirements or desired performance characteristics of supplies or

David Manning
Head of Purchasing Agency
GUAM SOLID WASTE AUTHORITY
October 9, 2014

services to be procured without including restrictions which do not significantly affect the technical requirements or performance characteristics.” *See*, 5 GCA § 5268(c). The GSWA’s cab forward specification is a restriction that does not “significantly affect the technical requirements or performance characteristics” of the refuse trucks to be acquired.

Please be advised that pursuant to the Guam Procurement Law you are not to proceed further with the procurement or award of a procurement contract prior to resolution of this bid protest. *See*, 5 G.C.A. § 5425. Furthermore, a receiver appointed by a federal court must comply with local law. *See*, 29 USCS § 959.

I look forward to your resolution of this protest expeditiously.

Sincerely,

DOOLEY ROBERTS & FOWLER LLP

Kevin J. Fowler

Suite 201
Tamuning, Guam 96913

DOOLEY ROBERTS & FOWLER LLC
RECEIVED
OCT 24 2014
[Signature]

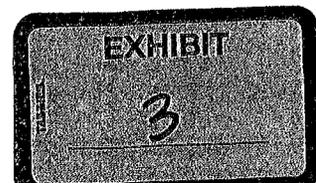

Dear Mr. Fowler:

We have reviewed the protest filed in your letter dated October 9, 2014 on behalf of your client Morrigo Equipment, LLC ("Morrigo"). You state the reason for this protest as GSWA's refusal to amend the cab forward specification; a specification you allege has no substantive basis as a specification necessary to carry out the purposes for which the refuse trucks are being acquired. You further allege that while Guam Law requires specifications to be geared toward increasing competition among potential vendors, "GSWA's cab forward specification is unduly restrictive, is in fact designed to reduce competition, and will actually increase costs for the Territory." You also indicate that the "The GSWA's cab forward specification is a restriction that does not 'significantly affect the technical requirements or performance characteristics' of the refuse trucks to be acquired."

As an initial matter, this protest is not timely. All protests are to be made in writing within 14 days of the time Morrigo knew or should have known of the cab forward specification in IFB-GSWA001-15. The bid was issued on September 18, 2014. Morrigo picked up the bid on September 19, 2014, and attended the Mandatory Pre-Bid conference on September 23, 2014. Therefore, at the very latest, Morrigo's protest should have been filed no later than 14 days after September 23, 2014.

We take the concerns you have expressed very seriously. It is always the Receiver's goal to achieve maximum competition within the specifications required to meet GSWA's legitimate needs. It is in the spirit of that goal that GSWA will address the issues raised in the protest, notwithstanding Morrigo's failure to timely file the protest. Since the subject bid for Refuse Collection Trucks includes two categories of trucks: 25 cubic yard refuse trucks and 10 cubic yard refuse trucks; we will assume that your protests applies to both categories.

The specification for the cab forward design is a substantive basis as a specification and is necessary to carry out the purposes for which the refuse trucks are being acquired. GSWA customers live in diverse areas that are often on narrow streets and roads requiring maximum maneuverability for GSWA's drivers to be able to safely and efficiently navigate these roadways and driveways to serve these customers. Based on GSWA's experience in Guam and the experience of other solid waste collection services in other areas, the cab forward design offers significantly better maneuverability and better visibility to the drivers. This enables more efficient use of the equipment to service routes and enhanced safety for GSWA personnel and the public.

Mr. Kevin J. Fowler
October 22, 2014
Page 2 of 2

The specification is also geared toward increasing competition among potential vendors. Numerous manufacturers offer a cab forward design. These include Mack, Peterbilt, Autocar, Crane Carrier, Oshkosh, Volvo, FUSO, Hyundai and Freightliner. FUSO, Hyundai and Freightliner are listed on your client's letterhead as products sold by your client's company. Given the numerous manufacturers of vehicles that will meet this specification, several of which are represented by dealers on Guam, the specification is not proprietary and is clearly geared toward increasing competition among potential vendors to meet the specifications required to provide GSWA with the equipment it needs.

The cab forward design has been used throughout the world by governments and private sector companies in many applications including refuse collection. It holds a significant market share in a highly competitive market. The governments and private sector companies purchasing these vehicles base their decisions on a body of experience that reflects their real world experience and their assessment of value received.

The cab forward specification will save GSWA in maintenance costs. GSWA has significant experience with both conventional and cab forward designs. From a maintenance perspective we find the ease of accessibility to most of the important engine components is an advantage for the cab forward design, helping reduce repair time and costs. Our research indicates that others using these vehicles have had a similar experience.

GSWA also values the input of its front-line workers when making purchasing decisions. Based on our discussions with these front-line workers who actually use the equipment, their overwhelming preference is for the cab forward design. Therefore, GSWA finds that Morrico's challenges to the cab forward specification based on comfort of the operators, access to the engine, and operator visibility to be unfounded.

For the reasons set out above, GSWA rejects your protest.

It is our hope that representatives of all of the manufacturers of these vehicles, including your client, will aggressively bid to provide these trucks to GSWA.

Thank you.

Sincerely,

David L. Manning
Receiver Representative

VOCATIONAL TRUCKS
BUSINESS CLASS M2

EXHIBIT

4

Built for durability. Engineered for power.

The Business Class® M2 line of trucks offers unparalleled benefits that help businesses increase productivity, performance and profitability. Available in 106- and 112-inch BBC platforms, the Business Class M2 supports a wide range of bodies and chassis-mounted equipment, making it the ideal solution for pickup and delivery, towing, food and beverage distribution, tanker and fire/emergency applications. Vocational models are available for specialized jobs such as refuse, construction, utility and government/municipality.

Designed for the demands of your business.

Driving in a challenging environment requires a truck that's agile, comfortable and easy to drive. That's why the Business Class M2 delivers a tight turning radius, and its optional automatic transmission is easy on new and experienced drivers alike. And because driver comfort is key, this truck features a spacious cab with low step-in height, an advanced heating and cooling system and a smooth, quiet ride.

BUSINESS CLASS M2

Best overall value.

Increased efficiency leads to increased profits, so the Business Class M2 offers great fuel economy and easy maintenance for maximum productivity with minimum downtime. Adding to the value of ownership is Freightliner's legendary customer support, a network of more than 400 dealers across North America and a 24-hour assistance hotline that will keep you operating at peak efficiency day in and day out. The Business Class M2 is more than just a vehicle. It's a clear business advantage.

Versatility and efficiency to meet the demands of today's business.

BUSINESS CLASS M2 106

The all-around performer.

The Business Class M2 106 is the true utility player of the family, offering the perfect platform for a variety of applications. Available as a truck or a tractor, it is extremely agile, featuring up to a 55-degree wheel cut, set-back front axle and swept-back bumper for excellent maneuverability in tight urban situations.

With a GVWR of up to 60,000 pounds, this medium-duty vehicle supports a wide range of bodies and chassis-mounted equipment. It comes standard with a powerful yet fuel efficient Cummins® ISB or ISC engine, with horsepower ratings from 200-380 hp. It's available with manual, automatic and automated transmissions from Eaton® Fuller® and Allison®, as well as Freightliner's SmartShift® option that offers hands-on-the-wheel shifting. For even greater efficiency, the M2 106 is available with a hybrid power system.

Stylish and practical, the Business Class M2 106 features an aerodynamic sloped hood, low profile dash and an expansive 2,500 square-inch windshield that gives drivers unparalleled visibility. With a multiplex wiring system, clear frame rails and a variety of exhaust packages, you can get the configuration you need for the job at hand.

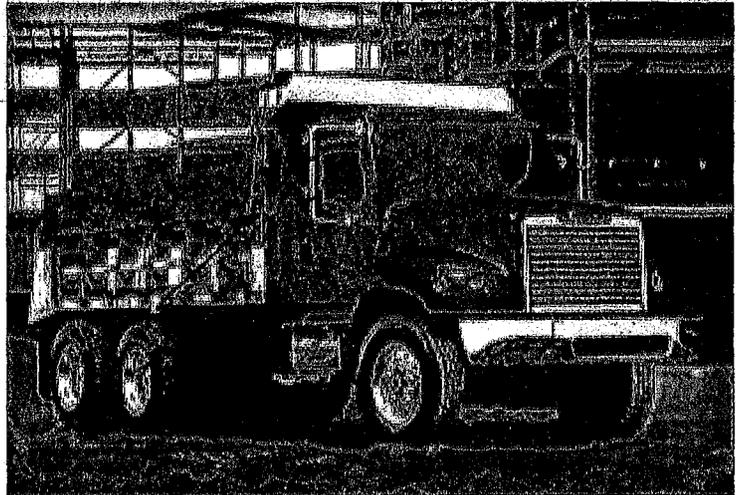

BUSINESS CLASS M2 106V

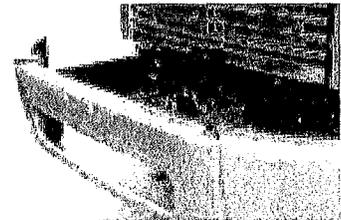

For applications requiring a front engine PTO.

Freightliner's Business Class M2 106V is designed for vocational applications requiring a front engine PTO and front frame extensions, such as refuse collection, snow plowing, crane and utility operations and fire/emergency needs. Front frame rail extensions in 6" and 24" lengths come standard and give a solid mounting point for hydraulic pumps, winches, front stabilizers and snowplows.

Available with front suspension ratings up to 20,000 pounds and single or dual steering gears, the Business Class M2 106V will take on jobs previously unsuited for a truck this size. It comes standard with the Cummins ISC engine with 260-380 hp. But for all its power, it is amaz-

ingly agile. Like its sibling the Business Class M2 106, it features a tight wheel cut and a lightweight aluminum cab that maximizes payload. Its 1,200 square-inch radiator provides excellent cooling capacity, capable of handling up to 80,000 pounds GVW at the highest engine rating. Also featured is the PTO shaft running below the radiator. The Business Class 106V is a perfect solution for specialized applications.

Ready to take on heavy-duty assignments.

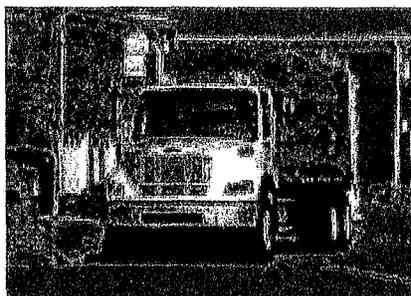

BUSINESS CLASS M2 112

Built for power and performance.

With a GVWR of up to 80,000 pounds, the Business Class M2 112 is the truck for the most demanding situations. It comes standard with a powerful Detroit Diesel DD13™ engine, with horsepower ratings from 350-450 hp and up to 1,650 ft.-lbs. of torque. Transmission options include manual, automatic and automated transmissions from Eaton Fuller and Allison, as well as Freightliner's SmartShift option that offers hands-on-the-wheel shifting.

The Business Class M2 112 has a lightweight aluminum cab that maximizes payload and resists corrosion. It's available as a truck, tractor or truck with end-of-frame connectors. With optional spring or air suspensions—including Freightliner's TufTrac® and AirLiner® rear suspensions rated up to 52,000 pounds—this truck delivers a smooth, even ride under the most demanding conditions. In fact, with frames of up to 3.7 million RBM and 1,500 square-inch radiators, the Business Class M2 112 can tackle the toughest jobs. Consider our clean natural gas-powered truck, the M2 112 NG, and get even tougher on operating costs.

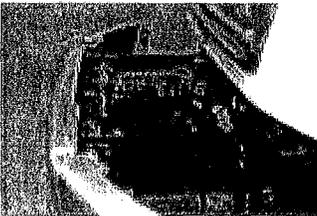

BUSINESS CLASS M2 112V

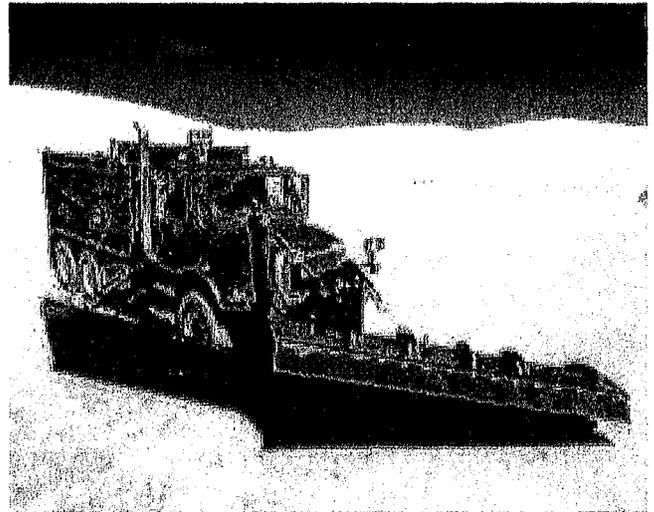

**For vocational applications
requiring a front engine PTO.**

The Business Class M2 112V is designed for vocational applications requiring high horsepower and a front engine PTO, such as snow plows, refuse collection and mixers. The front engine PTO comes standard with front frame rail extensions in 12" or 24" lengths and optional dash-mounted controls.

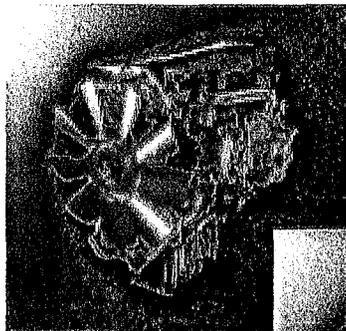

The standard engine is the Detroit Diesel DD13. With horsepower ratings from 350-450 hp and up to 1,650 ft.-lbs. of torque, you get the best combination of power, fuel efficiency and ease of service.

The Business Class M2 112V is all about choices. Select from a full range of transmissions, each with PTO capabilities. Choose from the easy-to-replace three-piece steel bumper that comes standard, or opt for the rigid one-piece bumper for severe applications. Standard is a wing dash that brings controls and gauges closer to the driver and an air-ride seat that assures a smooth, comfortable ride. For operating in adverse conditions, the cab features a precise HVAC system that keeps temperatures constant and an insulation package that protects against noise and temperature extremes. Whatever the job, the Business Class M2 112V is ready and willing to take on the assignment.

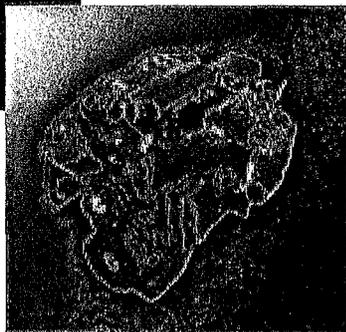

Powered for serious performance.

The Business Class M2 may look stylish on the outside, but underneath it's pure productivity. A broad range of engine and transmission choices allows the buyer to select the optimum combination to match virtually any business application.

Detroit Diesel DD13

Cummins ISC or ISB (shown here)

Optimized performance under the hood and on the road.

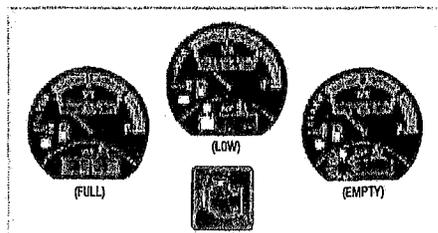

Since 1978, many different exhaust systems in Europe have incorporated SCR technology. Based on environmental advantages and payback to owners in less maintenance, increased fuel economy, better reliability and more uptime, it's clearly been proven the best EPA 2010 choice. Even so, Freightliner and the majority of the vocational trucking industry didn't take the decision to go with SCR lightly. We've driven more than 30 million SCR test miles in North America alone, including more than 2 million customer miles under real-world freight hauling conditions.

Different DEF Tanks

For ease of filling and increase of fill interval to standard maintenance intervals, Freightliner offers 6-, 13- and 23-gallon DEF tanks.

The DEF gauge is integrated into the diesel fuel gauge.

The gauge indicates the level of DEF in the tank and has a series of alerts when the tank is running low. A driver who ignores their DEF low level warnings will see de-rates and restrictions on their vehicle, but will never be stranded.

*Just watch the gauge.
It's that simple!*

ENGINES	
TYPE	RATINGS
Cummins ISB	200 - 360 hp / 520 - 800 ft.-lbs. torque
Cummins ISC	260 - 380 hp / 660 - 1,050 ft.-lbs. torque
Cummins ISL G (natural gas)	up to 320 hp / 1,000 ft.-lbs. torque
Detroit Diesel DD13	350 - 450 hp / 1,250 - 1,650 ft.-lbs. torque
	<i>Higher hp ratings are available for emergency service applications only.</i>

TRANSMISSIONS	
Eaton Fuller Manual	5-, 6-, 9-, 10-, 11- or 13-speed
Eaton Fuller AutoShift & UltraShift	10-speed
Allison	1000, 2000, 3000 and 4000 series

AXLES	
TYPE	CAPACITY (lbs.)
Steer	6k, 8k, 10k, 12k, 13k, 13.3k, 14k, 14.7k, 16k, 18k, 20k
Drive	10k, 12k, 13k, 15k, 17.5k, 19k, 20k, 21k, 23k, 26k, 30k
Tandem	34k, 40k, 44k, 46k, 52k, 58k

FAST FACTS ABOUT DEF

- DEF is non-toxic, biodegradable and non-flammable.
- Urea, a component of DEF, is a mild substance used in skin softening dish soap, tooth whitening formulas and as a pretzel browning agent.
- DEF has a shelf life of up to 18 months.
- DEF begins to freeze at 12° Fahrenheit.
- Start up and normal operation of vehicle is not inhibited if DEF freezes.
- The SCR system is designed to thaw DEF if it freezes.
- DEF is not damaged when frozen and is fully usable when thawed.
- If exposed to temperatures above 85° F for extended periods of time, DEF becomes less concentrated; it will still work in the SCR system, but may be consumed more rapidly than normal.
- If an improper fluid is placed in the DEF tank, shut down the engine immediately and contact your local service center.

Engineered for body builder flexibility.

Efficient placement of wiring and pneumatic lines.

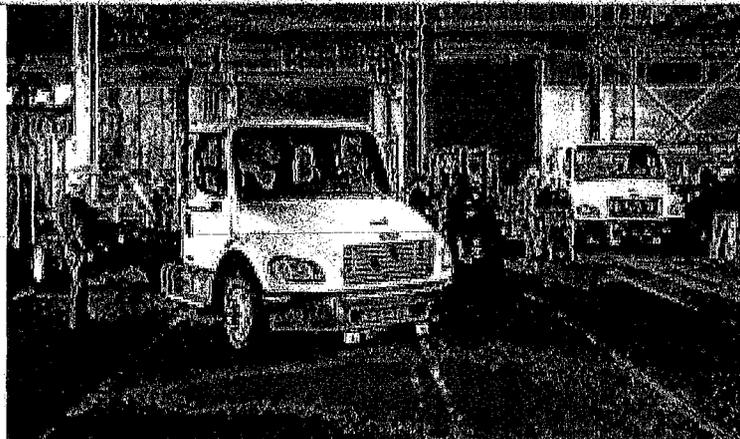

Electrical, pneumatic and fuel lines are neatly organized inside the left-hand rail for most applications. This relieves congestion at the back of cab, making access easier for body builders and service technicians.

Wiring connectors eliminate splicing.

To assist body builders, Freightliner has pre-engineered standard interfaces for engine wiring and lighting. Vehicle Interface Wiring Connectors eliminate the need for splicing and provide an easy "plug and play" point for body builders to connect such things as brake lights, turn signals and tail lights. Interface connectors for the engine and transmission allow clean connections at convenient locations on the chassis for feature activation: no need to wire directly to engine or transmission control modules. The in-cab power net distribution block, available for body builder expansion, provides fused power for body controllers.

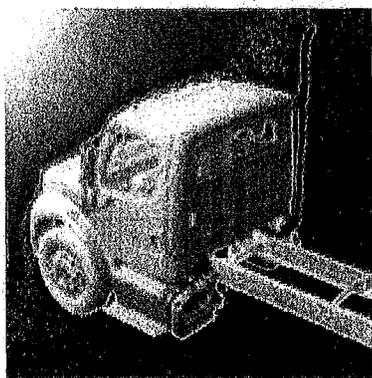

Adding switches is easy.

The Smart Switch system enables switches in the cab interior to be easily added or interchanged without removing the dashboard. Programming can be configured for specific vocational trucks, such as utility vehicles, refuse haulers, emergency vehicles and street sweepers.

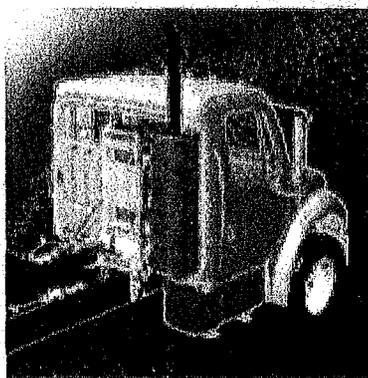

Order by vocational application.

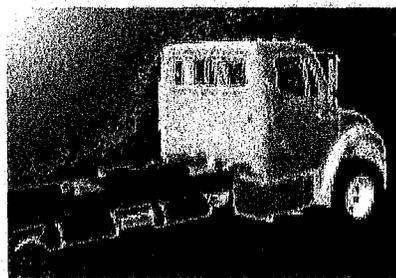

With the multiplex wiring system, body builders can modify PTO interlocks with software instead of having to design a new harness. And for new truck orders, the M2 Body Builder website, www.M2BodyBuilder.com, contains suggested data codes that allow ordering by vocational application. You can access the website 24 hours a day, without a password, for the most current information on the Business Class M2 including the M2 Body Builder Book and the M2 Electrical Reference Manual. Contact your sales professional to determine factory available data codes for your next order.

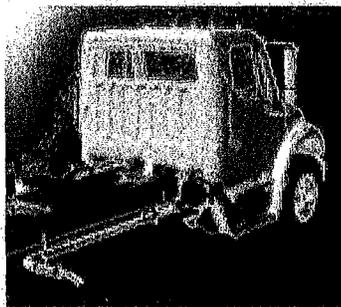

CLEAR BACK OF CAB TAILPIPE
Clear left-hand and right-hand transmission PTO mounting locations

VERTICAL ATD TAILPIPE

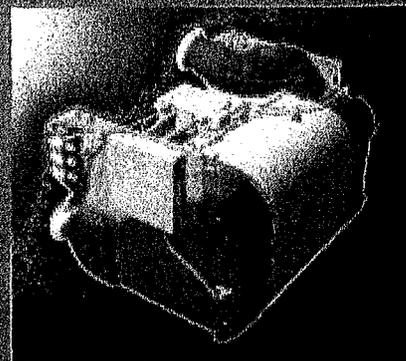

CLEAR UNDER CAB TAILPIPE

CURBSIDE EXIT TAILPIPE

Clear frame rails back of cab and a variety of EPA 2010 exhaust configurations suit most upfits. So whether you choose the Cummins SCR aftertreatment system or the DD13™ 1-Box, we have the perfect solution for you.

Detroit Diesel BlueTec® DD13 1-Box™

A cab that works with the driver.

The Business Class M2 has an aerodynamic aluminum cab with a steel reinforced front wall, making it strong, lightweight and rust resistant. Every aspect of the cab was designed to make the driver's job less of a job, leading to increased productivity.

To reduce fatigue for drivers who make frequent stops, the cab features a low step-in height with slip-resistant dual steps, a large door opening

and strategically placed exterior and interior grab handles. For safety, the cab's hood slopes downward for better line-of-sight, and a 2,500 sq. in. windshield provides excellent visibility for spotting potential hazards. Optional down-view mirrors and an optional lower window in the passenger door provide greater visibility in hard-to-see areas.

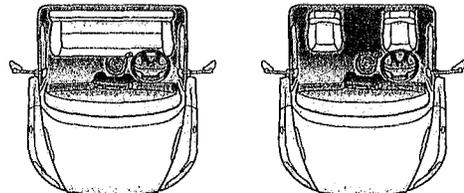

CAB CONFIGURATIONS / OPTIONS

The Business Class M2 has flexible seating options for any application. Front bench seats are available in day and crew cabs, while a rear bench seat is available in both the extended and the crew cab. Air-suspended and SCBA seats are available with most seating options. A few of the many seating configurations are shown here.

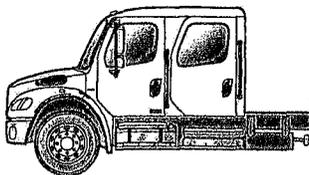

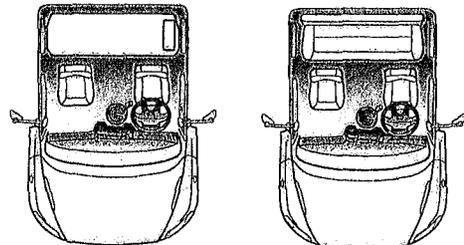

DAY CAB

- Full width bench seat
- Fixed or air suspension driver and passenger seats
- Passenger seats with SCBA, storage or locking safe provisions

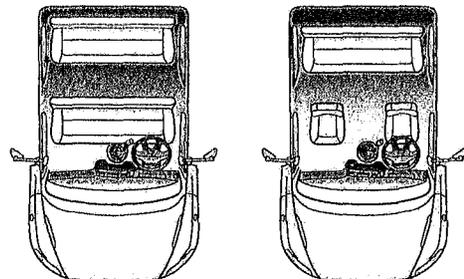

26" EXTENDED CAB

- 24" liftable bunk with storage
- Full-width rear bench seat or forward-facing rear jump seats
- Fixed or tip-out tinted side rear windows
- Cab privacy curtain

48" CREW CAB

- Rear bench or individual seats including air-suspended and SCBA
- Electric rear door windows

CAB FEATURES

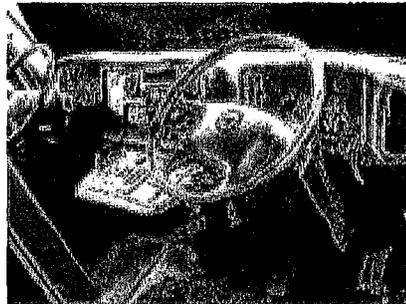

- Firewall and hood liner insulation
- Single or dual, electric or air horns
- LED marker lights
- Daytime running lights
- Swivel-mounted utility lights
- Mirror-mounted AM/FM/WB/CB antennas
- Aerodynamic airshield roof deflector or roof fairing
- Bonded or roped-in tinted windshield
- Painted or chrome exterior sun visor
- Black or chrome door mounted mirrors with heat or remote control
- Tinted door glass with operating or fixed wing windows
- Door-mounted down-view mirror
- Cab side extenders
- Exterior assist handles
- Fender- or hood-mounted auxiliary convex mirrors
- Heated door-mounted auxiliary convex mirrors
- Black plastic, painted steel or stainless steel quarter fenders
- Fender extensions
- Integral headlight/marker lights mounted in hood
- Painted or chrome front grille
- Painted or chrome three-piece bumpers, flexible plastic ends available
- Clear or amber fog lights, mounted in or under bumper
- Chrome air intake

Some features may be optional.

ALL-WHEEL DRIVE AND DUAL DRIVE OPTIONS

Selected Business Class M2 models can be ordered with an all-wheel drive option and several combinations of axles and suspension for optimized performance.

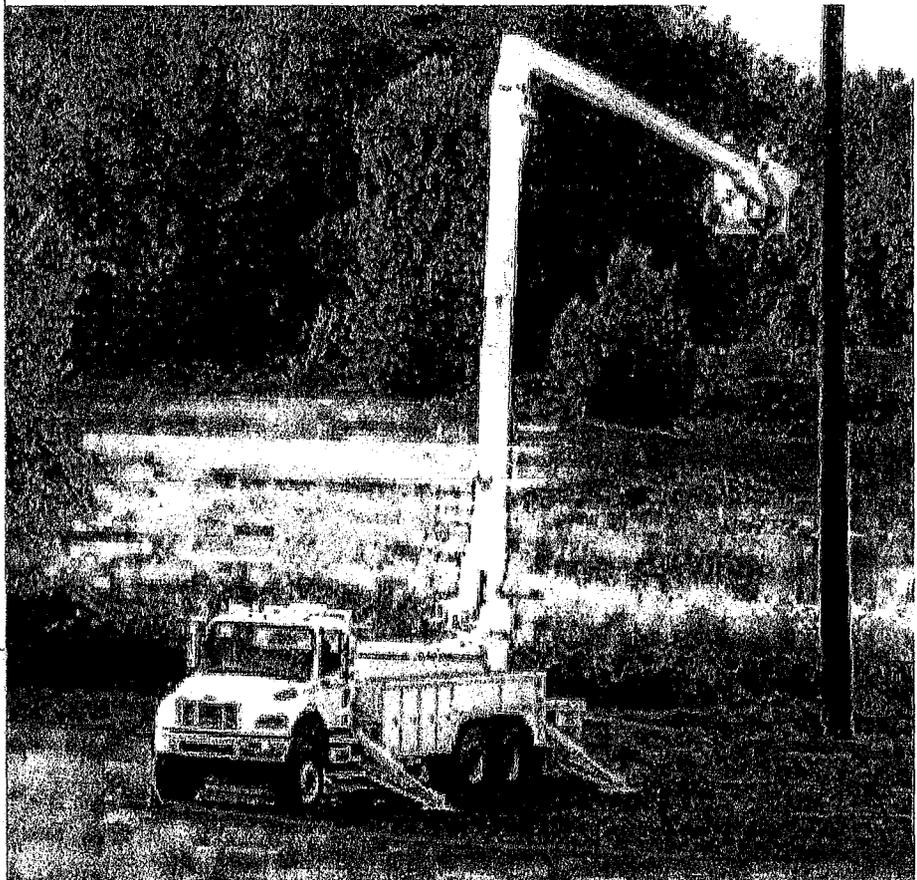

Sit-Down and Stand-Up Dual Drive options are available on the Business Class M2 106 and 106V truck models, is an easy-to-use feature that allows for smooth transitions from left-to-right-hand drive operations. Installed by Fontaine Modification, the right-

Interior of the Business Class M2 106 featuring the Sit-Down Dual Drive Option.

hand drive option is ideal for use in refuse collection, road striping, street sweeping and other applications where a right-hand drive option is advantageous.

The all-wheel drive option optimizes off-road performance.

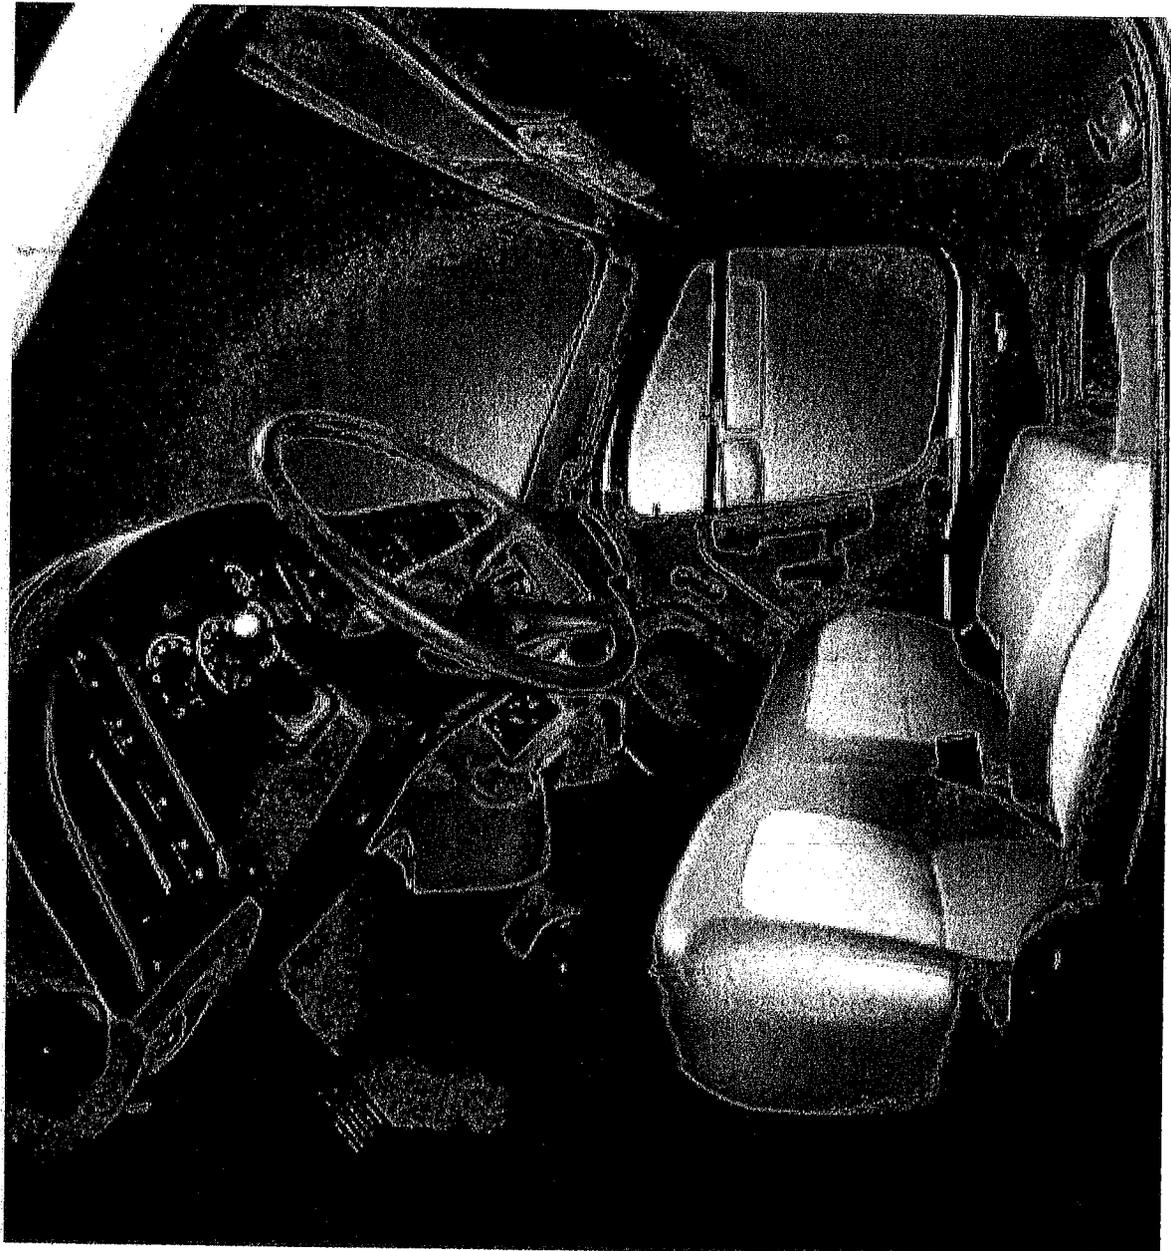

A productive place to spend the day.

Sure, a truck is a business on wheels, but it's also a driver's home for eight or more hours a day. That's why we've designed the Business Class M2 with the driver in mind.

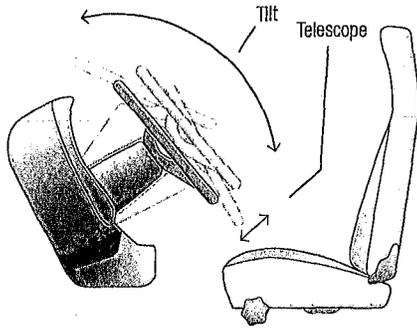

The cab is wide and deep, providing the driver much-appreciated elbow and leg room. The ergonomically designed driver's area features an automotive style dashboard, easy to read LED-backlit gauges and controls that are within easy reach. An advanced heating and air conditioning system provides excellent air flow for uniform temperature

control throughout the cab, and extensive interior insulation reduces noise and provides additional protection against the elements.

And for those who use their truck as an office, the Business Class M2 offers plenty of storage space. Items can be stored in the overhead console that comes standard or in the optional floor-mounted compartment that features a writing surface, printer provision and 12-volt power outlet.

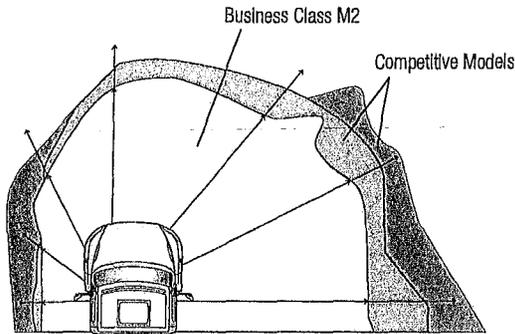

TILT AND TELESCOPE STEERING

The foot-controlled release on the adjustable steering column lets both hands stay on the wheel while providing an infinite number of adjustments.

VISIBILITY

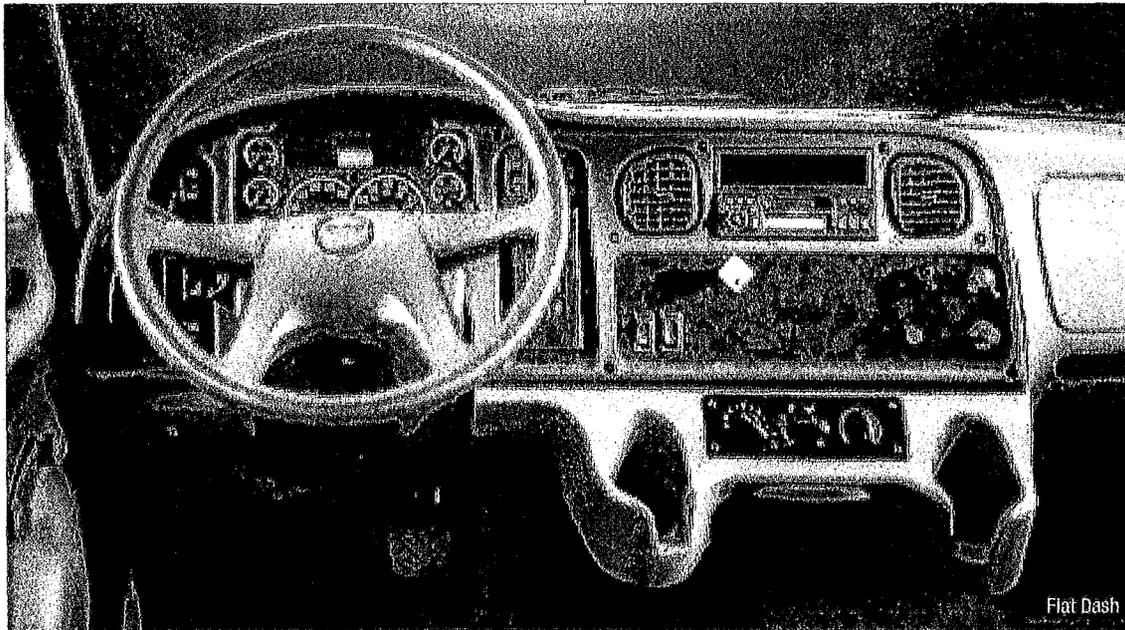

The Business Class M2's visibility zone starts closer than that of competitive truck models, to provide better visibility for maneuverability and safety.

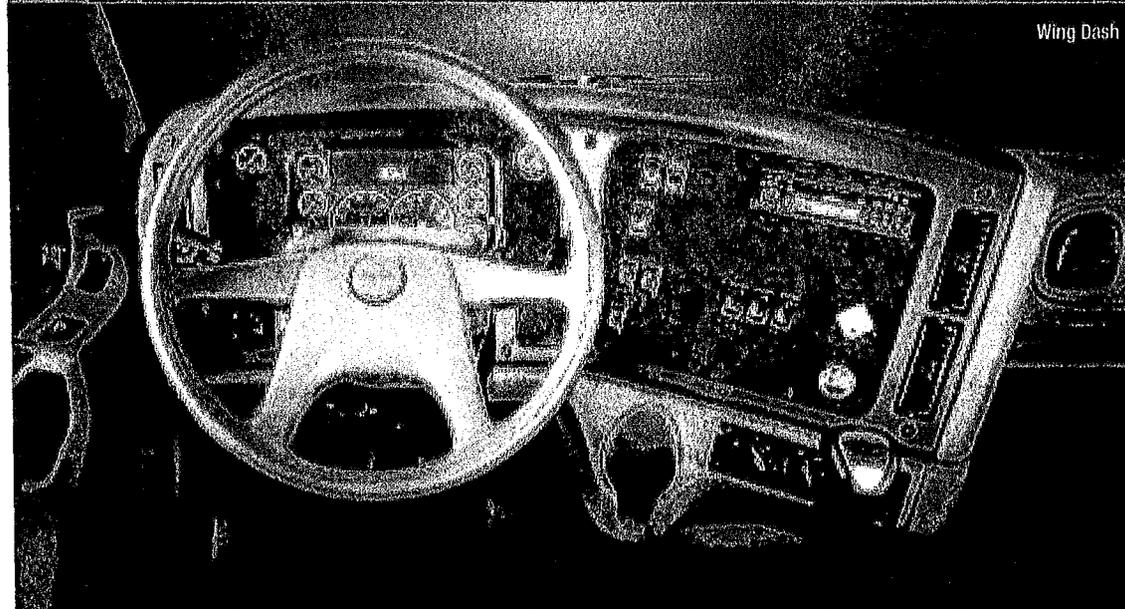

INTERIOR FEATURES

- Door-activated dome lights
- Overhead console with additional center storage
- Dual reading lights mounted in overhead console
- Multiple between-seat storage options including writing surface
- Electric powered door windows and door locks
- Door-mounted storage
- Two cupholders molded into lower dash
- Complete selection of driver and passenger seats including storage, safe and SCBA options
- Washer fluid level indicator
- Trip odometer, tachometer, transmission temperature and air pressure gauges
- Heater and defroster or heater, defroster and air conditioner
- AM/FM, Weatherband or Sirius Satellite radios with CD
- CB mounting provision conveniently located in overhead console
- Wing dash
 - Standard on M2 112/112V
 - Optional on M2 106/106V
- Interior convenience package
 - Woodgrain dash
 - Vinyl door trim
 - Extra overhead storage
 - Dual reading lights (day cab)

Some features may be optional.

Flat Dash

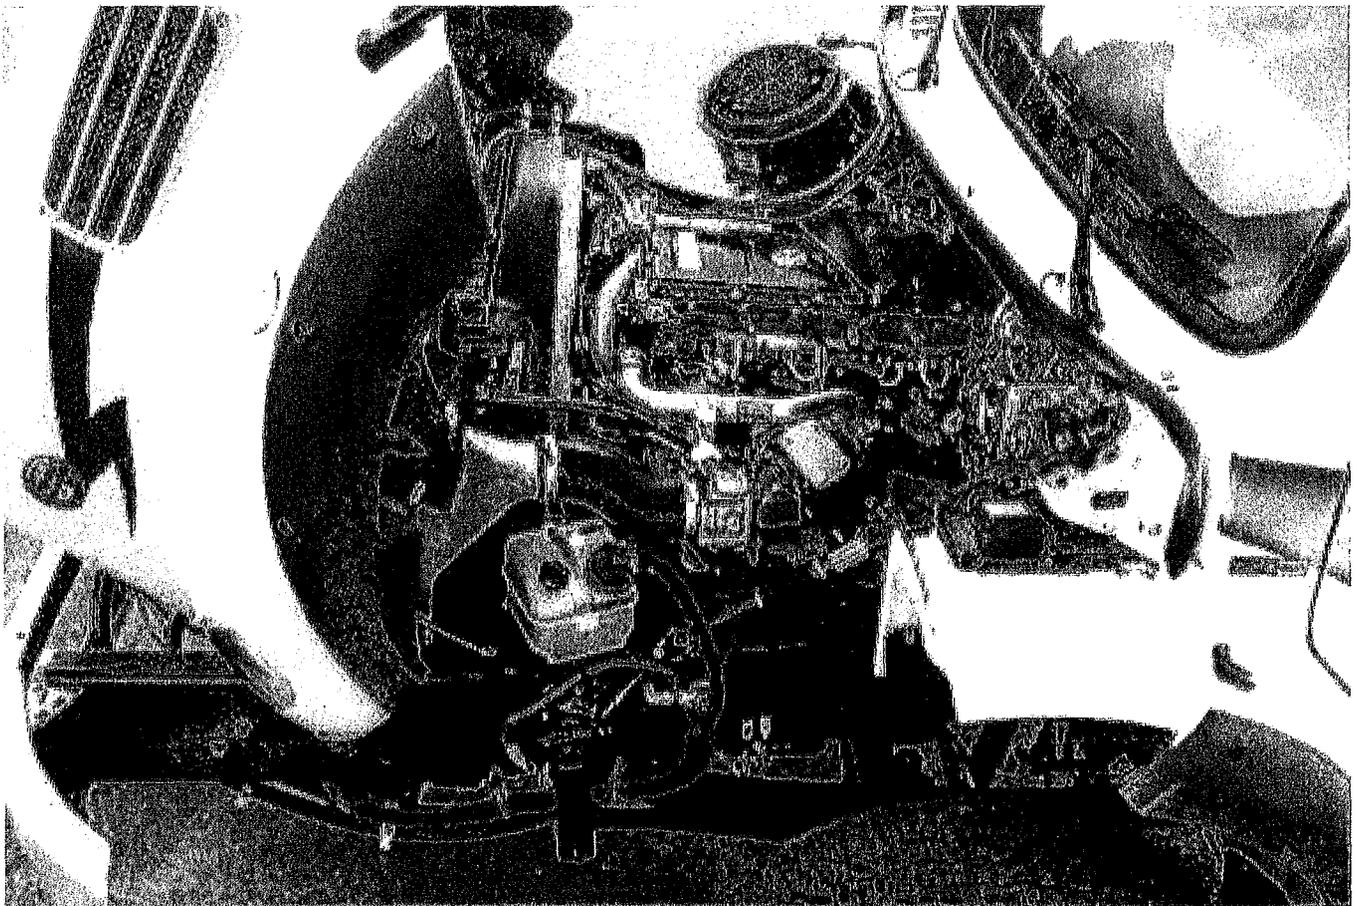

Wing Dash

Maintenance made easy.

We've designed the Business Class M2 to be easy to maintain, with quick access to critical maintenance points. The hood opens easily and features integrated splash shields that lift out of the way for better accessibility. Frequently inspected components are strategically placed, allowing for faster repairs and adjustments. See-through fluid reservoirs reduce the time spent checking fluid levels and a removable floor section allows access to the transmission without removing the floor covering.

The standard proprietary Donaldson PowerCore™ air cleaner is designed to go longer between replacements, yet still traps 99.85 percent of airborne particles before they reach the engine. The Business Class M2 features a lube-free steering shaft, a self-adjusting hydraulic clutch and suspensions that require no maintenance or lubrication.

The truck's multiplex electrical system has about half the wires of a traditional electrical system, which reduces possible failure points and allows technicians to more quickly pinpoint electrical problems. Even the three-piece bumper was designed to save repair costs by allowing partial replacement. The result is a vehicle that spends more time on the road.

Support that delivers peace of mind.

With more than 400 Freightliner dealer locations across North America, you're never far from the convenient service and support you have come to expect from the industry leader. In addition, over 200 Freightliner ServicePoint® facilities located at TravelCenters of America and Petro Stopping Centers offer certified repair and warranty work. When you need a factory-certified technician, Detroit Diesel offers more than 800 locations in North America. Freightliner also maintains strategically located parts distribution centers throughout North America, ensuring fast parts delivery to keep customers up and running.

Freightliner's Customer Assistance Center provides customers a hotline that's available 24 hours a day, seven days a week. Customers may call the toll-free number (1-800-FTL-HELP) for technical support, to arrange roadside assistance or towing services, or to locate the nearest dealer or service center.

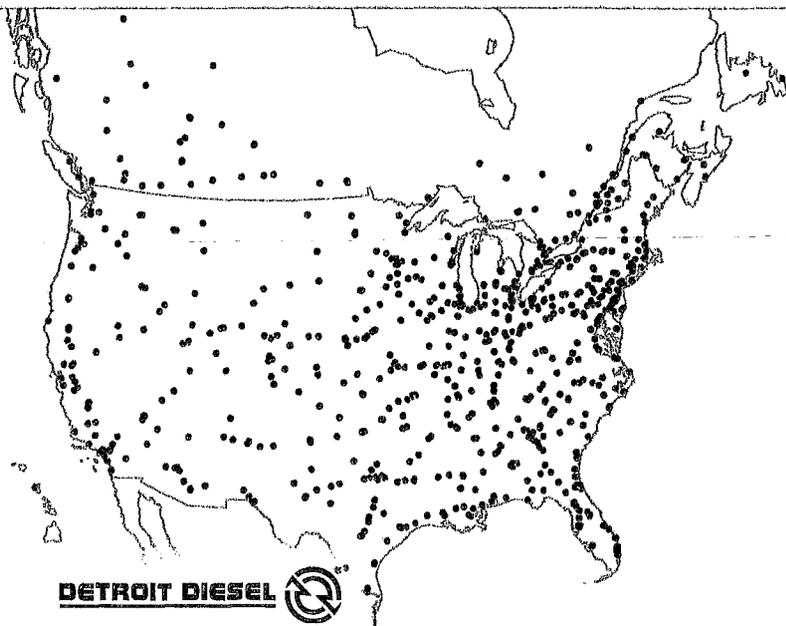

A simple purchase process that's second to none.

Purchasing a truck is one of the most important decisions you make. Freightliner makes the buying process easy, with highly trained sales consultants and one of the largest dealer networks in the industry, so businesses don't have to look far for their next purchase. Trucking professionals count on Freightliner dealers for reliable product information, truck parts and service, and ongoing customer support.

Financing is easy.

Daimler Truck Financial (DTF) offers a variety of options, including loans and leases tailored to the trucking industry that make financing go smoothly. DTF has been meeting the financing challenges of owner-operator and vocational customers for over 30 years. It offers finance solutions including conventional retail financing at attractive and competitive rates, a variety of terms to match cash flow, and up to 100% financing for qualified customers.

Daimler Truck Financial
Financing that works for you.

DETROIT DIESEL

Comprehensive warranties for added peace of mind.

Freightliner stands behind its trucks every step of the way. We offer one of the most comprehensive warranties in the business, as well as a variety of extended warranties.

Reliable, affordable parts.

Freightliner's private label products, sold under the Alliance Parts brand, offer quality parts at affordable prices. From starters and batteries to belts and brake drums, Alliance parts, accessories and components fit virtually all types of heavy-duty trucks. Alliance also offers an extensive line of remanufactured components such as engines, transmissions, clutches and more. Alliance parts are sold at Freightliner dealers throughout the U.S. and Canada.

SPECIFICATIONS AND OPTIONS

ENGINE AND POWERTRAIN ACCESSORIES

- Detroit Diesel DD13 engines
- Cummins ISB engines
- Cummins ISC engines
- Cummins ISL G Natural Gas engines
- Electronic engine management system
- Maintenance-free electrostatic breather system
- Engine brakes
- Emergency service application HP ratings available
- 160 amp alternator standard, with other options available
- Several clutch options from Eaton Fuller and Sachs
- Hydraulic and mechanical clutch control options
- Engine shut-down protection system
- Exhaust and compression brakes
- Electric engine coolant preheater
- Electric oil pan heater
- Eaton Fuller 5-, 6-, 9-, 10-, 11- or 13-speed manual transmissions
- Eaton Fuller 10-speed AutoShift & UltraShift transmissions
- Allison automatic transmissions
- Factory PTO provisions
- FEPTO & REPTO acceptability

CHASSIS

- Clear frame rail back of cab
- Towing provision at end of frame
- Battery shut-off switch
- Left-hand and right-hand exhaust (horizontal or vertical)
- Taper-leaf and flat-leaf front suspension capacity from 6,000 lbs. to 20,000 lbs.
- Front shock absorbers included with taper-leaf and available for flat-leaf suspensions
- Meritor rear axles, capacity from 10,000 lbs. to 58,000 lbs.
- Freightliner AirLiner, Tuffrac, multi-leaf, taper-leaf and flat-leaf suspensions to 52,000 lbs.
- Hendrickson HM/RT/RTE suspensions up to 65,000 lbs.
- Wide family of frame rails available up to 7'16" x 11-1/8" with 1/4" c-channel inner reinforcement
- Integral front frame extensions
- Driver-controlled differential lock for traction control
- Painted or chrome three-piece bumpers with flexible plastic ends available

- Optional one-piece 1/4" rigid bumper
- Clear or amber fog lights, mounted in or under bumper
- InstaHeat fuel heaters
- Black plastic, painted steel or stainless steel quarter fenders
- Alliance or Davco fuel/water separators
- Back-up alarm
- Tire sizes up to 445/65 R22.5
- Left, right or dual 30- to 120-gallon aluminum fuel tanks (cylindrical on Business Class M2 112)
- 6-, 13- or 23-gallon DEF tanks

CAB

- 106" or 112" BBC aluminum cab
- 2-door, stand-up, right-hand drive available
- Sit-down, dual drive available
- Metal door kick plates
- Available wing dash or flat dash
- Aerodynamic airsheld roof deflector or roof fairing
- Cab side extenders
- Fender extensions
- Painted or chrome front grille
- Firewall and hood liner insulation
- Single or dual, electric or air horns
- Integral headlight/marker lights mounted in hood
- LED marker lights
- Daytime running lights
- Swivel-mounted utility lights
- Black or chrome door-mounted mirrors with heat or remote control
- Door-mounted down-view mirror
- Heated door-mounted auxiliary convex mirrors
- Fender- or hood-mounted auxiliary convex mirrors
- Painted or bright exterior sun visor
- Tinted door glass with operating or fixed wing windows
- Bonded or roped-in tinted windshield
- Mirror-mounted AM/FM/WB/CB antennas
- Windshield wiper motor with delay
- Hood access hatches on 106V and 112V
- Argent or bright engine air intake

DRIVER SAFETY AND COMFORT

- Driver convenience package
- Rubber, leaf spring or air cab mounts
- Exterior assist handles
- Electric powered door windows and electric door locks
- Washer fluid level indicator
- Lower right-hand door window
- Door-mounted storage
- Overhead console with additional center storage
- Heater and defroster, or heater, defroster and air conditioner
- Two cupholders molded into lower dash
- Multiple between-seat storage options including writing surface and 12-volt power supply
- Complete selection of driver and passenger seats including storage, safe and SCBA options
- Silencer package or extreme climate thermal insulation
- Door-activated dome lights
- Optional step lighting package
- Dual reading lights mounted in overhead console
- Adjustable tilt and telescoping steering column
- Trip odometer, tachometer, transmission temperature and air pressure gauges
- AM/FM, Weatherband or Sirius Satellite radios with CD
- CB mounting provision conveniently located in overhead console
- Cordura seat covers

Some options not available on all models.

Visit your local Freightliner dealer for complete specifications and options.

Quarterly Report of the Receiver

Civil Case No. 02-00022

United States of America v. Government of Guam
Guam Solid Waste Authority

Prepared for:

U.S. District Court of Guam

Submitted by:

Gershman, Brickner & Bratton, Inc.
8550 Arlington Blvd, Suite 304
Fairfax, Virginia 22031

October 9, 2014

Printed on recycled paper

When a customer becomes 60 days behind in payment, GSWA Customer Service staff contact the customer by mail and telephone to provide a reminder to the customer, encouraging them to make payment to ensure that their account is restored to good standing. If the customer fails to pay and becomes 90 days or more behind in payment, a work order is placed to repossess the cart and terminate service. GSWA operations staff collects these carts. Seven hundred sixty-four (764) carts were repossessed during this reporting period, and 207 of these carts, or 27 percent, were returned to customers after they had paid their balance due and a \$50 reinstatement fee.

Personnel

On June 30, 2014, GSWA had 30 full-time Government of Guam employees and 24 workers employed by the Receiver through our contract with Pacific Human Resources, Inc. (PHRS). In addition, there were two employees under contract directly with the Receiver for a total of 57 full-time equivalent employees.

GSWA Board of Directors

During the reporting period, three official meetings of the GSWA Board of Directors were held. Below are highlights from these meetings.

April 10, 2014: The Receiver provided an overview of collection and disposal options for green waste. The Receiver invited John Limtlaco, who owns and operates a composting facility on Guam, and Professor Mohammad Golabi, an expert in the composting field, to the Board's meeting to discuss current activities related to green waste and the Rhinoceros Beetle blight. The Receiver also provided an overview of GSWA's fleet maintenance contracts with private companies.

May 15, 2014: An ad hoc committee of the Board tasked with reviewing the process of transitioning temporary GSWA employees into full-time government workers reported on the committee's meeting with the Receiver and GSWA personnel. The discussion focused on the three classifications of employees: full-time government employees, temporary employees from a private human resources company, and employees contracted directly by the Receiver.

June 17, 2014: The Receiver discussed with Board members the status of the Request for Proposals for the Board's legal representation.

The minutes and agenda for each meeting are posted on the GSWA website (www.guamsolidwasteauthority.com/bod.html), and the audio of each meeting is also available online through the website of the Office of the Public Auditor (www.guamopa.org/index.php?pg=board-and-commission-meetings).

Island-wide Curbside Recycling Program

As of June 30, 2014, GSWA had provided recycling carts to all customers serviced by the larger garbage trucks, approximately 90 percent of GSWA's curbside trash customers. Residential customers who live on roads where the large garbage trucks cannot travel because of road conditions, low hanging wires and

branches or inability to turn the vehicle around, receive trash collection with what GSWA refers to as Baby Packer trucks, which are pickups with small containers on their beds. The customers on the Baby Packer trash routes were not provided recycling carts because the Baby Packer trucks cannot efficiently serve these customers for recycling. However, GSWA is concluding a bid for two 10-cubic-yard compactor trash trucks that are expected to replace the current Baby Packer trucks. Once placed into operation, GSWA will be able to provide curbside recycling service to many of the remaining 10 percent of GSWA's customers.

Figure 8 shows the recycling tonnage collected in the Island-wide Curbside Recycling Program thus far in 2014. From January through June 2014, 881.07 tons were collected at the curb. Approximately half of this tonnage, 445.18 tons, was collected at the curb during this three-month reporting period. GSWA collection crews take the recyclable material to Guahan Waste Services, the contractor that processes and sells the material. Revenue for the recyclable material from January through June 2014 totaled \$7,385.24, of which \$3,545.92 was attributed to this reporting period.

Figure 8. Recycling Tonnage January 2014 through June 2014

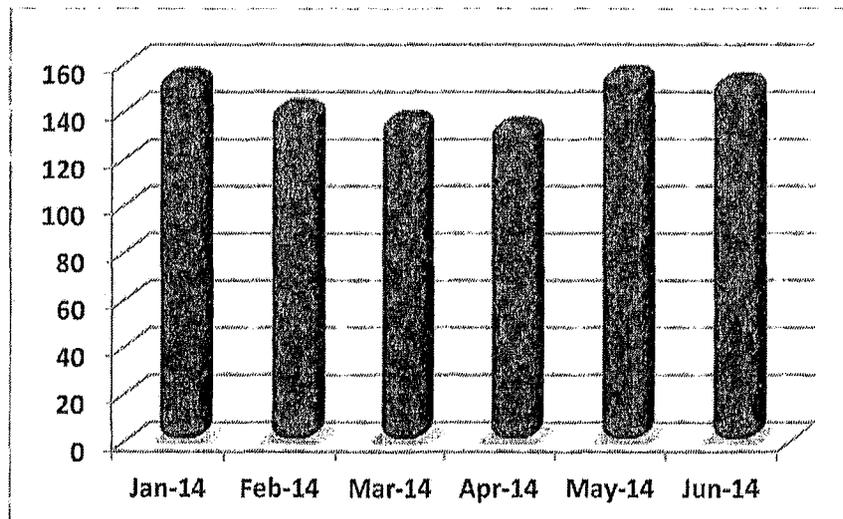

Figure 9 shows the percentage breakdown by material of recyclables collected during this reporting period.
